

# **CRIME IN SOUTH CAROLINA**

**2005 ANNUAL REPORT**  
**Initial Figures for the Year 2005**  
**Final Figures for the Year 2004**

**COMPILED BY THE STATE LAW ENFORCEMENT DIVISION**  
**SOUTH CAROLINA INCIDENT BASED REPORTING SYSTEM**

## **PLEASE NOTE**

Figures used in this report are submitted by law enforcement agencies throughout South Carolina. Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between jurisdictions due to the existence of numerous factors which affect the amount and type of crime from place to place. Some of these factors are listed in the report. It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

## SOUTH CAROLINA LAW ENFORCEMENT DIVISION

MARK SANFORD  
*Governor*

ROBERT M. STEWART  
*Chief*

October 27, 2003  
November 17, 2006

*Crime in South Carolina 2005 Annual Report* contains information regarding crime in our state and provides initial figures for 2005, and final figures for 2004. We hope that this report will be used by the public and professionals alike to better understand the character of criminal acts.

I would like to thank the law enforcement personnel and agency heads in South Carolina whose cooperation and contributions made this report possible.

Robert M. Stewart, Chief  
South Carolina Law Enforcement Division

An Accredited Law Enforcement Agency

P.O. Box 21398 / Columbia, South Carolina 29221-1398 / (803) 737-9000 / Fax (803) 896-7041

# *Dedication*

*This book is dedicated to all law enforcement officers,  
and in particular to the ones who died  
while upholding the laws and serving the citizens of South Carolina.*

*The following officer died in the line of duty during 2005:*

*- Senior Trooper Jonathan Wade Parker -  
S. C. Department of Public Safety*

**SOUTH CAROLINA**  
**UNIFORM CRIME REPORTING PROGRAM**

## **BACKGROUND OF UNIFORM CRIME REPORTING**

### **NATIONAL UCR PROGRAM**

Development of the current nationwide Uniform Crime Reporting (UCR) Program over fifty years ago. In 1930, crime counts were first requested from local police departments with the Federal Bureau of Investigation (FBI) designated by Congress to collect, compile and analyze the statistics. The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) played a primary role in the origin and development of UCR and today serves in a strong advisory capacity. Standardized offense classification and counting procedures developed by the IACP are the basis for the UCR program. The National Sheriffs' Association (NSA) also serves in an advisory role to the national program. The publication, Crime in the United States, is the annual report published by the FBI dealing with national crime statistics.

In recent years the FBI has actively assisted states in the development of level UCR programs compatible with the national system.

### **SOUTH CAROLINA UCR PROGRAM**

South Carolina was one of the first states to implement an operational state UCR program. The South Carolina Law Enforcement Division is the agency administering the program. The information collected and the uniform classification under which it is collected are based directly upon the guidelines developed by the IACP and FBI.

Upon initiation of the South Carolina UCR program in July, 1973, SLED, in conjunction with the FBI, held workshops around the state to instruct or refresh the county and city law enforcement agencies on the scope of the program and the mechanics of completing the forms.

Since that time, SLED, along with the local law enforcement agencies, has instituted an incident-based records management system which has greatly enhanced and improved the quality of information gathered under the Uniform Crime Reports system. Under this procedure, crime data and other information gathered by municipal and county law enforcement agencies are collected and submitted to SLED on a daily, monthly and annual basis. This new system lent itself to a more complete and accurate crime reporting system which, in most instances, alleviated some of the paperwork with which many departments had been burdened. An additional advantage of using standard incident and booking reports was realized from the uniformity of documents. Standardized reports facilitated the exchange of information between law enforcement agencies within the state. The forms have been included in the report writing classes taught at the South Carolina Criminal Justice Academy.

In 1991 South Carolina became one of the first states to implement the new National Incident Based Reporting System (NIBRS) which was developed by the FBI, using our state as a model and demonstration site. The NIBRS is an enhanced version of the previous South Carolina system and is currently in various stages of implementation in other states. The system is expected to be in nationwide use in a few years.

## **OBJECTIVES**

The fundamental objectives of the South Carolina Uniform Crime Reporting Program are:

- (1) To inform the governor, legislature, other governmental officials and the public as to the nature of the crime problem in South Carolina.
- (2) To provide law enforcement administrators with criminal statistics for administrative and operational use.
- (3) To determine who commits crimes by age, sex, race and other attributes in order to find the proper focus for crime prevention and enforcement.
- (4) To provide base data and statistics to help measure the workload and effectiveness of the criminal justice system.
- (5) To provide base data for research to improve the efficiency, effectiveness and performance of criminal justice agencies.

A particularly important goal of the state UCR program is to return statistical information to the contributors. With implementation of the new incident reporting system, participating police agencies furnish data that are classified, coded, and then returned to each jurisdiction in the form of monthly printouts. The information enables them to make decisions in budgeting, manpower allocations and the identification of high crime areas.

This information is also forwarded by SLED to the FBI on a monthly basis for inclusion in the FBI's annual UCR publication.

## **REPORTING AND CLASSIFICATION**

In reporting offenses to the Uniform Crime Reports program, crimes are classified according to standard definitions that are used throughout the nation (given in later sections of this publication). The UCR definitions are designed to insure that offenses with different titles under the laws of the various states are appropriately classified and counted under the UCR program. Crimes are classified without regard to the findings of courts or juries, since the statistics are gathered primarily to assist in identifying areas of concern to law enforcement officers, and not meant to reflect the outcomes of inquests, hearings or trials.

## **CRIME FACTORS \***

Each year when Crime in South Carolina is published, many entities – news media, tourism agencies, and others with an interest in crime in our State, compile rankings of cities and counties based on their Crime Index figures. These simplistic and/or incomplete analyses often create misleading perceptions which adversely affect cities and counties, along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements, some of which, while having significant impact, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if crime assessment is to approach completeness and accuracy. There are several sources of information which may assist the responsible researcher. The U.S. Bureau of the Census data, for example, can be utilized to better understand the makeup of a locale's population. The transience of the population, its composition by age and gender, education levels, and prevalent family structures are some factors to be considered in assessing and better understanding the crime issue.

The National League of Cities provides information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/economic base, its dependence upon neighboring jurisdictions, its transportation system, its economic dependence on nonresidents (such as tourists and convention attendees), its proximity to military reservations, etc., all help in better gauging and interpreting the crime known to and reported by law enforcement. More detailed information can, of course, be obtained from a city's or county's chamber of commerce, planning/information office, or other similar entity.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors. For example, one city may report more crime than a comparable one, not because there is more crime, but because its law enforcement agency through proactive efforts, such as "sting operations," identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible about how to categorize and quantify the nature and extent of crime in South Carolina. Valid assessments are only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors which are known to affect the volume and type of crime occurring from place to place are:

- Population density and degree of urbanization with size of locality and its surrounding area.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to residents' mobility, commuting , and transient factors.
- Modes of transportation and highway system.
- Economic conditions, including median income, poverty level, and job availability.
- Cultural factors, such as educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative, investigative, and reporting emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Citizens attitudes toward crime.
- Crime reporting practices of citizenry.

Crime in South Carolina gives a statewide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While other factors are of concern, no attempt is made to relate them to the data presented. **The reader is, therefore, cautioned against comparing statistical data of individual cities, counties, or universities solely on the basis of their population coverage.**

\* Factors paraphrased from FBI Publication, Crime In The United States.

## **SOUTH CAROLINA CRIME INDEX**

The tabulation presented in the tables, graphs, and charts in this publication indicate the volume, fluctuation, and distribution of crime in South Carolina on the basis of a crime index. The crime figures are categorized by agency, county and state on the basis of information submitted by police agencies from these areas. The seven offenses comprising the crime index are:

- 1) Murder
- 2) Rape
- 3) Robbery
- 4) Aggravated Assault
- 5) Breaking or Entering
- 6) Larceny
- 7) Motor Vehicle Theft

Definitions of these seven offenses can be found elsewhere in this book under their separate headings.

The crime index is used as a basic measure of crime. The crimes were selected for use as an index on the basis of their serious nature, their frequency of occurrence, and the reliability of reporting from citizens to law enforcement agencies. The offenses of murder, rape, robbery and aggravated assault are categorized as violent crimes. Offenses of breaking or entering, larceny and motor vehicle theft are classed as nonviolent crimes. The crime index is the total of these offenses that come to the attention of law enforcement agencies.

In reviewing crime index figures, the reader should bear in mind that there is currently no way of determining the total number of crimes committed. The crime index has been established to measure only the instances of crime which come to the attention of law enforcement agencies. It is important to remember in reviewing the tables and graphs in this report that the volume of crime in a given area or municipality is related to the crime factors previously listed in this report.

## **CRIME RATES**

The crime rate indicates the number of Index Crimes per unit of population, generally per 10,000. It should be noted that the rate only takes into consideration the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given community. The effect of changes in population on rates should be kept in mind when attempting to make a comparison of crime rates.

The population data used in this report are supplied by the State Data Center, Division of Research and Statistical Services. For the twenty year Crime in South Carolina Rates per 10,000 population table, found on pages 16-17, U.S. Bureau of the Census preliminary population estimates for South Carolina are used for the years 1985-1989, rounded to the nearest thousand. S.C. Division of Research and Statistical Services population projections as of July 1 of each year are used for the years 1990-2005, rounded to the nearest thousand, unless noted otherwise.

## **PERCENT CHANGE**

Changes in the numbers of offenses and arrests from year to year are shown in a number of tables in the publication. The percent change shown after any figure reflects a comparison to information reported the previous year.

### **PERCENT ROUNDING**

Percentages shown in this publication may not add to 100 due to gross rounding (usually shown to the nearest tenth, but sometimes to the nearest whole). Percentages under 0.5 are shown as zero percent on all pie charts.

### **UPDATED DATA INITIAL AND FINAL FIGURES**

In 1991, the SC Incident Based Reporting System (SCIBRS) adopted in to the conventions of the FBI's National Incident Based Reporting System (NIBRS). One of those conventions was the NIBRS Time Window for adding, updating, and correcting crime data reported to the state and national repositories.

Prior to 1991, under the old Summary Based UCR rules, any additions, updates, or corrections to figures for the previous year had to be made by adjusting the numbers reported during the current year. E.g., If an agency had one actual murder during a month in the current year, but then learned of another murder that had actually occurred in the previous year, then that agency would report two murders for the current month. It quickly becomes clear that this method of reporting updates negatively affects the accuracy of crime counts in both the current year and the previous year. When the increased detail of NIBRS data over UCR data is considered, the issue of accuracy is compounded.

With the adoption of the concept of the NIBRS (and SCIBRS) Time Window it became possible to freely add, update, or correct any data for an incident that occurred during the current calendar year and the previous calendar year (usually referred to as "current year minus one").

Therefore, for purposes of this annual crime report, the data for the most recent year is to be considered as "initial" data - it is still open to additions, updates, and corrections. Data for previous years is to be considered "final", since those years have passed outside the Time Window and can no longer be adjusted.

### **SOME 2001 AND 2002 DATA NOT AVAILABLE**

Due to abbreviated collection of data for the years 2001 and 2002, some data usually found in this report are not available. Where data are not available for tables and graphs displaying trends, the notation "N/A" appears.

SCIBRS returned to normal data collection procedures for the year 2003.

## DEFINITIONS

**INDEX**

The index, or crime index, consists of the counts used as indicators of the crime picture in a given jurisdiction (state, county, city). The index does not include counts of all crimes reported, but uses seven categories (murder, rape, robbery, aggravated assault, breaking or entering, larceny and motor vehicle theft) as pointers or indicators of the overall crime situation. Crimes in the index are selected according to their hierarchy position.

**HIERARCHY**

The hierarchy system, or crime hierarchy, selects crimes according to their ranking or seriousness. When using the hierarchy system to obtain crime counts, only the most serious category of crime is counted in any single criminal incident. The hierarchy order of the index is murder, rape, robbery, aggravated assault, breaking or entering, larceny, and motor vehicle theft.

For example, if a criminal event includes both a murder and rape, only the murder will be counted in the index.

**INCIDENT**

An incident is a single criminal event. One incident may include several categories of crimes, multiple victims, and multiple offenders.

**VICTIM**

A victim, in this publication, is an individual person who has had a violent crime committed against him or her. (In other contexts, but not in this report, a business or organization may be described as a victim.) Victims, here, are described by age, sex, and race.

**OFFENDER**

An offender, in this publication, is a person who has committed a crime, but who may or may not have been arrested. Offenders are described to police by victims and witnesses of crimes by age, sex, and race. (Offenders are sometimes called subjects or suspects, but those terms are not used in this report.)

**PERSONS  
ARRESTED**

A person arrested is someone who has been apprehended by law enforcement officers for committing one or more crimes. A juvenile is counted as a person arrested if he or she is apprehended or otherwise officially handled by law enforcement officers for committing one or more crimes, regardless of whether the juvenile is incarcerated or even formally charged.

## **NOTICE TO THE READER**

### **NIBRS REPORTING**

South Carolina was the first state to publish an annual report using the new National Incident Based Reporting System (NIBRS). NIBRS is currently being developed in other states, and in a few years may replace the old UCR system. While this Crime in South Carolina limits itself primarily to the usual Index that has been used for years, there are some differences in the way crimes are counted in certain tables. These are outlined below.

### **HIERARCHIED DATA**

The hierarchy system dictates that only the most serious crime in any incident may be counted. For instance, if a single incident reported a murder, a rape, and a robbery, only the murder would be counted. Unless otherwise noted, the crime counts have been tallied according to the national hierarchy system, the same as in previous years. This provides continuity in the trends.

### **INDIVIDUAL INDEX CRIME SECTIONS**

The counts for the tables within the individual crime sections (Murder, Rape, Robbery, etc.) vary according to whether the table is showing the number of weapons, premises, vehicles, or victims.

In order to provide greater detail, another factor that affects the counts in some of these tables is that the information has not been subjected to the old UCR hierarchy system. These tables often reflect different counts than the index tables, since all crimes in a given category may be counted without regard to hierarchy.

### **VICTIM AND ARRESTEE TABLES**

The Victim and Arrestee tables found in the index crime sections for Rape, Robbery, Aggravated Assault (pages 32, 33, 40, 41, 48, 49), and the Arrestee tables for Breaking and Entering, Larceny, and Motor Vehicle Theft (pages 56, 61, and 67) have not been subjected to the hierarchy rule. All Victims and Arrestees linked to these crimes and arrests are counted.

### **FORCIBLE RAPE, BURGLARY COUNTS**

In this publication:

SCIBRS counts both female and male victims of Forcible Rape, according to the NIBRS definition (page 29). The FBI counts only female victims.

SCIBRS counts one Burglary for each incident in which rental storage units are burglarized. The FBI counts one Burglary for each individual unit entered.

# S. C. CRIME INDEX DATA

## **ROUNDING**

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

**SOUTH CAROLINA  
CRIME CLOCK  
2005**

one  
**MURDER**  
every 27 hours, 43 minutes

one  
**Forcible Rape**  
every 4 hours, 48 minutes

one  
**ROBBERY**  
every 1 hour, 34 minutes

one  
**INDEX CRIME**  
every 2 minutes  
26 seconds

one  
**AGGRAVATED ASSAULT**  
every 21 minutes

one  
**BREAKING OR ENTERING**  
every 13 minutes

one  
**NONVIOLENT CRIME**  
every 2 minutes  
52 seconds

one  
**LARCENY**  
every 4 minutes

one  
**MOTOR VEHICLE THEFT**  
every 32 minutes

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the index crimes. This mode of display should not be taken to imply a regularity in the commission of the index crimes; rather, it represents the annual ratio of crime to fixed time intervals.

### 2003-2005 CRIME INDEX TRENDS

# CLEARANCES

For crime reporting purposes, an index crime is cleared when a law enforcement agency has identified and located the offender and there is enough evidence to charge him. The arrest of one person can clear several crimes, or several persons may be arrested in clearing one crime. Clearances are recorded in exceptional circumstances when some element beyond law enforcement control precludes the arrest of the offender.

# MURDER

## DEFINITION

Murder is defined as the willful (non-negligent) killing of one human being by another, except those cases classified as justifiable homicides. Under the UCR definition, justifiable homicides are specifically limited to the killing of an offender by a police officer in the line of duty, or the killing, during the commission of a serious crime, of a criminal by a private citizen. This definition does not take into consideration the findings of coroners' juries, or other courts. Suicides are not defined as murder under UCR. Attempts to commit murder are classified as aggravated assaults.

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

### 2005 SUMMARY

A total of 316 murder victims was reported in the 2005 crime index. During this year, the number of murders increased 8.6 percent compared to those reported in 2004.

There were 251 murders cleared by arrest or exceptionally cleared, amounting to a clearance rate of 79.4 percent statewide.

Murders accounted for 1.0 percent of all violent crimes and 0.1 percent of the total crime index. The index murder rate in South Carolina was 0.74 per 10,000 persons.

The age group 17-24 accounted for 44.4 percent of persons arrested for murder. Males represented 89.5 percent of the total arrests made for murder.

Firearms were used in 67.9 percent of the murders, cutting instruments in 15.7 percent, hands and feet in 7.0 percent, other weapons in 5.4 percent, and unknown weapons in 4.0 percent.

# FORCIBLE RAPE

## DEFINITION

Forcible Rape, by UCR definition, is the carnal knowledge of a person forcibly or against that person's will, or when a victim is mentally or physically incapable of giving consent. Attempts to commit rape are included in this category. One offense is counted for each victim of rape. Statutory rapes and other types of sexual assaults are not counted as rape under the UCR program.

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

### 2005 SUMMARY

There were 1,825 forcible rapes reported in the 2005 crime index. During this year, rapes increased 3.0 percent compared to those reported in 2004.

There were 939 rapes cleared by arrest or exceptionally cleared, amounting to a clearance rate of 51.5 percent statewide.

The number of forcible rapes committed per 10,000 persons was 4.3 statewide. The rate per 10,000 females was 8.3, based on a state female population projection of 2,176,722, as of July 1, 2005.

Of all persons arrested for rape, 70.6 percent were 34 years of age or younger. With regard to race, 44.7 percent were white, 54.4 percent were black, and 0.9 percent were other races.

Of the total rapes reported in 2005, approximately 7.1 percent were attempted.

The relationships of victims to offenders within the family represented 18.0 percent of the total, outside the family but known to the victim 58.1 percent, strangers 12.6 percent, and unknown relationships 11.2 percent.

### 2003-2005 RAPE INCIDENTS BY PREMISE

# ROBBERY

## DEFINITION

Robbery, for UCR purposes, is defined as the unlawful taking of the property of another through the use or threat of force. Robbery is a violent crime in which the element of personal confrontation between the victim and offender is present. Attempts to rob are included in the robbery count. Armed robberies, those involving weapons, and strong-arm robberies, those not involving weapons, make up the two major categories. One robbery is counted for each distinct operation, regardless of the number of victims present at the time.

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

### 2005 SUMMARY

There were 5,604 robberies reported in the 2005 crime index. During this year, robberies increased 3.0 percent compared to those reported in 2004.

There were 1,725 robberies cleared by arrest or exceptionally cleared, amounting to a clearance rate of 30.8 percent statewide.

Robberies accounted for 17.3 percent of all violent crimes and 2.6 percent of the total crime index.

The robbery rate in South Carolina was 13.2 per 10,000 persons.

The age group 17-21 accounted for 38.1 percent of persons arrested for robbery, followed by 34.1 percent for 22-34 years of age. Males represented 92.0 percent of the total arrests made. Of all persons arrested for robbery, 22.5 percent were white, 77.4 percent were black, and 0.2 percent were other races.

Firearms were used in 52.4 percent of all robberies, cutting instruments in 8.1 percent, hands and feet in 30.4 percent, other weapons in 5.5 percent, and unknown weapons in 3.6 percent.

The greatest number of robberies reported for any premise type occurred on streets and highways, accounting for 32.5 percent of the total.

### 2003-2005 ROBBERY INCIDENTS BY PREMISE

# AGGRAVATED ASSAULT

## DEFINITION

Aggravated Assault, for UCR purposes, is defined as an unlawful attack by one person upon another with the intent of inflicting serious bodily injury. Aggravated Assaults are frequently accomplished through the use or threatened use of dangerous weapons. However, assaults resulting in serious injury from the use of hands or feet are also counted in this category. Attempts to assault are counted here since it is not necessary that injury result whenever a dangerous weapon is employed. Attempts to commit murder are classified under this category. One offense is counted for each victim of aggravated assault.

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

### 2005 SUMMARY

A total of 24,685 aggravated assaults was reported in the 2005 crime index. During this year, aggravated assaults decreased 4.0 percent compared to those reported in 2004.

There were 14,650 aggravated assaults cleared by arrest or exceptionally cleared, amounting to a clearance rate of 59.3 percent statewide.

Aggravated assaults accounted for 76.1 percent of all violent crimes and 11.4 percent of the total crime index.

The aggravated assault rate in South Carolina was 58.0 per 10,000 persons.

The age group 25-34 accounted for 25.2 percent of persons arrested for aggravated assault. Males represented 79.7 percent of the total arrests made. Of all persons arrested for this offense, 42.7 percent were white, 56.8 percent were black, and 0.4 percent were other races.

Firearms were used in 22.2 percent of all aggravated assaults, cutting instruments in 18.3 percent, hands and feet in 29.4 percent, other weapons in 28.7 percent, and unknown weapons in 1.4 percent.

### 2003-2005 AGGRAVATED ASSAULT INCIDENTS BY PREMISE

# BREAKING OR ENTERING

## DEFINITION

Breaking or Entering, for UCR purposes, is defined as the unlawful entry of a structure with intent to commit a serious crime or theft. It is not necessary that force be used in gaining entry in order for the offense to be classified as an unlawful entry. Neither is it necessary that property loss occur for the crime to be counted in this category. Attempts to unlawfully enter a structure are also counted. One offense is counted for each distinct operation.

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

### 2005 SUMMARY

A total of 41,740 breaking or entering offenses was reported in the 2005 crime index. During this year, breaking or entering offenses decreased 2.0 percent compared to those reported in 2004.

There were 6,197 breaking and entering offenses cleared by arrest or exceptionally cleared, amounting to a clearance rate of 14.8 percent.

Breaking or entering accounted for 22.7 percent of all nonviolent crimes and 19.3 percent of the total crime index.

The breaking or entering rate in South Carolina was 98.1 per 10,000 persons.

The age group 17-21 accounted for 26.5 percent of persons arrested for breaking or entering. Males represented 89.3 percent of the total arrests made. Of all persons arrested for this offense, 51.7 percent were white, 47.9 percent were black, and 0.4 percent were other races.

There were 41,740 breaking or entering offenses reported in 2005. Of these 5.4 percent were attempts to commit breaking or entering.

### 2003-2005 BREAKING OR ENTERING INCIDENTS BY PREMISE

# LARCENY

## DEFINITION

Larceny, for UCR purposes, is defined as the unlawful taking of the property of another without the use of force or fraud. Larceny does not have the element of unlawful entry. This offense category includes such crimes as shoplifting, purse-snatching, stealing items from vehicles and the like. Larceny does not include thefts by fraud, forgery, embezzlement or similar crimes. Motor vehicle thefts fall under a separate category and are not counted as larcenies. Attempts to commit larceny are included in this category. One offense is counted for each distinct operation, regardless of the number of victims.

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

### 2005 SUMMARY

A total of 125,634 larceny offenses was reported in the 2005 crime index. During this year, larcenies decreased 3.2 percent compared to those reported in 2004.

There were 23,019 larcenies cleared by arrest or exceptionally cleared, amounting to a clearance rate of 18.3 percent statewide.

Larcenies accounted for 68.4 percent of all nonviolent crimes and 58.1 percent of the total crime index.

The larceny rate in South Carolina was 295.3 per 10,000 persons.

Persons under the age of 17 accounted for 21.3 percent of those arrested for all categories of larceny. Arrests of males accounted for 65.4 percent of the total.

Shoplifting thefts accounted for 13.7 percent of the larceny category, while thefts from motor vehicles made up 19.1 percent, thefts of motor vehicle parts and accessories 8.3 percent, and thefts from buildings 5.3 percent.

# MOTOR VEHICLE THEFT

## DEFINITION

Motor Vehicle theft, for UCR purposes, is defined as the theft of a self-propelled vehicle that runs on the surface of the land but not on rails. Motor vehicles include automobiles, trucks, motorcycles, and the like. One offense is counted for each vehicle stolen. This category does not include boats, farm equipment, tractors, bulldozers, etc. Motor vehicle theft does not include using a vehicle without the owner's consent if prior consent or lawful access has been granted. Obtaining vehicles through fraud or failure to return rented vehicles are not included in this category. Attempts to steal motor vehicles as well as "joyrides" are counted as motor vehicle thefts.

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

### 2005 SUMMARY

A total of 16,365 motor vehicle thefts was reported in the 2005 crime index. During this year, motor vehicle thefts increased 4.7 percent compared to those reported in 2004.

There were 2,383 motor vehicle thefts cleared by arrest or exceptionally cleared, amounting to a clearance rate of 14.6 percent statewide.

Motor vehicle thefts accounted for 8.9 percent of all nonviolent crimes and 7.6 percent of the total crime index.

The motor vehicle theft rate in South Carolina was 38.5 per 10,000 persons.

Of all persons arrested for motor vehicle theft, 76.4 percent were 34 years of age or younger. With respect to race, 52.3 percent were white, 46.5 percent were black, and 1.2 percent were other races.

There were 16,365 motor vehicle thefts reported in 2005. Of these, 2.5 percent were attempted motor vehicle thefts.

# ADDITIONAL SEX OFFENSES AND ASSAULTS

## NOTE

Since this section is not a part of the national or state crime index, the data have been included in this section separately, rather than being displayed with the index crimes.

## DEFINITION

The category of additional sex offenses is composed of forcible sodomy (oral or anal intercourse), sexual assault with an object (the insertion of any object into the anal or genital opening of a person's body), and forcible fondling (the touching of the private body parts of another person for sexual gratification). These crimes are committed forcibly and without consent, or in cases in which a person is mentally incapable of giving consent. Attempts are counted. Forcible rape is not included in this section.

## DEFINITION

Simple assault, for SCIBRS purposes, is defined as an unlawful physical attack by one person upon another where the offender neither uses nor displays a weapon, nor the victim suffers obvious severe or aggravated bodily injury. This category does not include verbal attacks or threats.

## DEFINITION

Intimidation, for SCIBRS purposes, is defined as follows: to unlawfully place another person in reasonable fear of bodily harm through the use of threatening words or other conduct, but without displaying a weapon or dangerous object, and without subjecting the victim to actual physical attack. "Stalking" can be intimidation if the victim feels a threat of bodily harm. Such threats can be made in person, by telephone, in writing, etc.

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

# SOUTH CAROLINA LAW ENFORCEMENT OFFICERS KILLED

## DEFINITION

The report, ***Crime in South Carolina***, covers only criminal activity. For purposes of this report, “Law Enforcement Officers Killed” refers only to those officers feloniously killed while acting in the capacity of a law enforcement officer, either on-duty or off-duty. (Annual figures for line of duty deaths in South Carolina compiled by the SC Law Enforcement Officers Hall of Fame include felonious assaults as well as deaths while on duty through other causes [ accidental or natural].)

## ROUNDING

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

### 2005 SUMMARY

During 2005, one South Carolina police officer was murdered in the line of duty.

On Monday, May 16, 2005, 29 year-old Senior Trooper Jonathan Wade Parker, a seven year veteran with the S. C. Department of Public Safety, was murdered by a 34 year-old male robbery suspect, who was attempting to elude other police officers.

**South Carolina  
OFFICERS ASSAULTED  
(Aggravated and Simple)**

**2005 SUMMARY**

During 2005, there were 1,101 assaults upon law enforcement officers.

Of the 1,101 officers assaulted, 5.2 percent were assaulted with firearms, 3.4 percent with cutting instruments, 15.5 percent with other weapons, 77.0 percent with hands, fists, etc, and 0.09 percent with unknown weapons.

Some degree of injury was sustained by 17.6 percent of officers assaulted; 11.5 percent of all injuries were caused by hands, fists, etc.

Of the 1,101 assaults on officers, 47.2 percent occurred between the hours of 8:00 PM and 4:00 AM.

**NOTE TO THE READER**

The information shown on the following three pages is based upon Aggravated Assaults against police officers, and will bear the notation "(Aggravated Only)". Unlike previous years, Simple Assaults are not available for 2002. Officer assault information is not available for the year 2001. All other information in the Officers Assaulted Section for the year 2004 is based upon both Simple and Aggravated Assaults against officers.

**2003-2005  
OFFICERS ASSAULTED BY PREMISE**

# SOUTH CAROLINA ARREST DATA

**ROUNDING**

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

# ARREST DATA

The Uniform Crime Reports Program requires a daily reporting of data concerning persons arrested in the state. Records of arrests for criminal acts in all crime classes are received from state, county and municipal law enforcement agencies in South Carolina and are classified by offense category and arranged according to age, sex and race of persons arrested. Traffic arrests, except driving under the influence, are not reported. A total of **238,081** arrests for all crimes was reported during **2005**, a **0.9** percent increase over **236,030** arrests reported for the year 2004.

A person is counted on the arrest report each time he or she is arrested or summoned. It should be kept in mind that the volume of arrests may vary from time to time due to differences in local arrest procedures and policies. It should be noted that a person may be arrested several times during a given month for different offenses. This occurs frequently for such crimes as public drunk, disorderly conduct and similar violations. A juvenile is counted as "arrested" when the circumstances are such that, if he or she were an adult, an arrest would be counted when law enforcement or other official action is taken beyond a mere interview, warning or admonishment.

When reviewing arrest figures, it should be remembered that arrest counts do not reflect the specific number of persons arrested since, as has been pointed out, one individual may be arrested several times during any given month or year. However, arrest data are useful in measuring the extent of law enforcement activity in a given geographical area, as well as in providing an index for measuring involvement in criminal acts by the age, sex and race of the offenders.

Analysis of reported arrests for the year **2005** indicates that **16.5** percent of arrests during the year were for Index offenses (murder, forcible rape, robbery, aggravated assault, breaking or entering, larceny, and motor vehicle theft). Arrests for larceny comprised the highest percentage of Index arrests, amounting to **51.2** percent, while arrests for simple assaults comprised **11.5** percent of Non-Index arrests. Persons arrested for alcohol and Drug violations (drug laws, DUI, alcohol laws, drunkenness) accounted for **28.5** percent of all arrests made during the calendar year **2005**.

## NOTE TO THE READER REGARDING DRUG ARRESTS

Prior to 1991, the UCR program did not have a specific category for drug equipment violations. Such arrests were counted under "All Other". From 1991 forward, all "Drug Law" arrest counts will include those arrests for drug equipment and paraphernalia violations.

**SOUTH CAROLINA  
ARREST CLOCK  
2005**

one  
**ARREST**  
every 2 minutes, 12 seconds

one  
**INDEX CRIME ARREST**  
every 13 minutes, 25 seconds

one  
**VIOLENT INDEX CRIME ARREST**  
every 43 minutes, 19 seconds

one  
**NONVIOLENT INDEX CRIME  
ARREST**  
every 19 minutes, 26 seconds

one  
**NON-INDEX CRIME ARREST**  
every 2 minutes, 39 seconds

The arrest clock should be viewed with care. Being the most aggregate representation of arrest data, it is designed to convey the annual reported arrest experience by showing the relative frequency of occurrence of all arrests. This mode of display should not be taken to imply a regularity in arrests; rather, it represents the annual ratio of arrests to fixed time intervals.

# CRIME AND ARREST DATA BY COUNTY

## **ROUNDING**

Percentages shown in the tables and charts may not add to 100% due to rounding. Rates per 10,000 population and percent changes also have been rounded.

## COUNTY CRIME RATES

County crime rates per 10,000 population are shown in the table below. The crime rates are based upon the latest population estimates available from the State Data Center, division of Research and Statistical Services, as of July 1, 2005. County population projections are based upon a State population total of 4,255,000 for 2005, and are rounded to the nearest hundred. Therefore, county population totals may not add to the state total due to rounding.

# COUNTY CLEARANCE PERCENTAGES

For crime reporting purposes, an index crime is cleared when a law enforcement agency has identified and located the offender and there is enough evidence to charge him. The arrest of one person can clear several crimes, or several persons may be arrested in clearing one crime. Clearances are recorded in exceptional circumstances when some element beyond law enforcement control precludes the arrest of the offender. Percentages shown below are rounded to the nearest whole. The term N/A indicates zero crime counts.

Williamsburg	50%	13%	3%	29%	5%	7%	2%	8%
York	100%	84%	49%	62%	20%	19%	28%	28%
<b>State</b>	<b>80%</b>	<b>52%</b>	<b>31%</b>	<b>59%</b>	<b>15%</b>	<b>18%</b>	<b>15%</b>	<b>23%</b>

**NOTE:** Clearance percentages in this table sometimes exceed 100%. The reason is that crimes from previous years may be cleared during the current year. For example, an agency may have had two murders in the current year and cleared both of them. If they also cleared a murder which occurred in a previous year, their clearance rate would be 150%.

# CRIME BY COUNTY AND AGENCY

## NOTES

1. Dashes ( -- ) beside a year indicate that this agency did not submit crime data for the year shown.
2. Months in parentheses indicate that this agency submitted fewer than 12 months of crime data in the year 2005. The number of months shown - E.g. (9 months) – indicate the number of months submitted.
3. A plus sign ( + ) indicates that the agency was not in existence during the year shown.
4. A < > sign indicates that the agency was covered by during the calendar year shown.

**\*Notes on Index offenses reported by state-level law enforcement agencies.**

Many state-level law enforcement agencies have specialized missions directed toward the enforcement of crimes not included in the national index used here. These specialized agencies or components include the SC Highway Patrol, the State Transport Police, SLED Vehicle Crimes, the SLED Vice Unit, the SC Forestry Commission, and the SC Department of Natural Resources. While the specialized priorities of the agencies result in many arrests and in the investigation of many offenses, the vast majority of Index offenses are reported by county and municipal agencies. In most cases, when state agencies assist local law enforcement, the incidents and arrests are reported by the county or municipal agency having local jurisdiction within each county.

For the reasons stated above, it is the practice in this report to omit publishing these agencies individually in each of the forty-six counties, thereby avoiding the addition of 230 lines of data that would show very few Index offense counts. The total Index offense counts submitted by these agencies for 2004 and 2005 are shown below.

State Agencies	Year	Murder	Rape	Robbery	Agg. Assault	B & E	Larceny	MVT	Index Total
	2004	0	0	0	7	0	18	1	26
	2005	0	0	0	6	0	22	7	35
